Front-end Developer

More than 5 years of experience working with web projects of different complexity. Experienced in working independently and leading the teams.

What am I looking for

I'm looking for a company where people care about their culture and working atmosphere. A company, which creates products and services based on its values rather than just profit.

I don't want to be valued based on the number of hours spent in the office, but based on my contribution and ability to create, learn, make decisions, communicate, and most importantly, be committed to achieve the vision of the company.

Skills

Core: JavaScript, TypeScript, React, HTML, CSS, Git

Testing: Jest, React Testing Library, Nightwatch

Automation: Webpack, Gulp

Other: Redux, Sass, Hugo, React Native, NodeJS, REST, GraphQL
